Problem Statement

- **Biased Resume Screening**

- Resumes are often influenced by name, gender, age, photo, or address leading to unconscious bias in hiring.

- **Fear of Retaliation**

- Many employees hesitate to report workplace issues due to fear of retaliation or a lack of anonymity.

- **Promotional Decisions**

- Promotion decisions can be unclear, leaving employees unsure why they weren't selected or overlooked.

Organizations struggle to create a fair, transparent, and data-driven workplace that employees can trust.

Why Existing Solutions Are Not Enough ?

ATS Screening

Screening using only
keywords

Complaint System

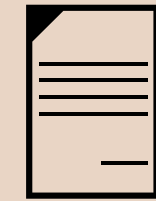

Fear of reporting

HR Analysis

Limited Diversity
Insights

Company Policies

Manual Review of Policies

Proposed Solution

An Explainable AI for Fair Hiring, Employee Growth & Transparency

FairLens leverages explainable AI to help organizations make fair, transparent, and data-driven HR decisions .

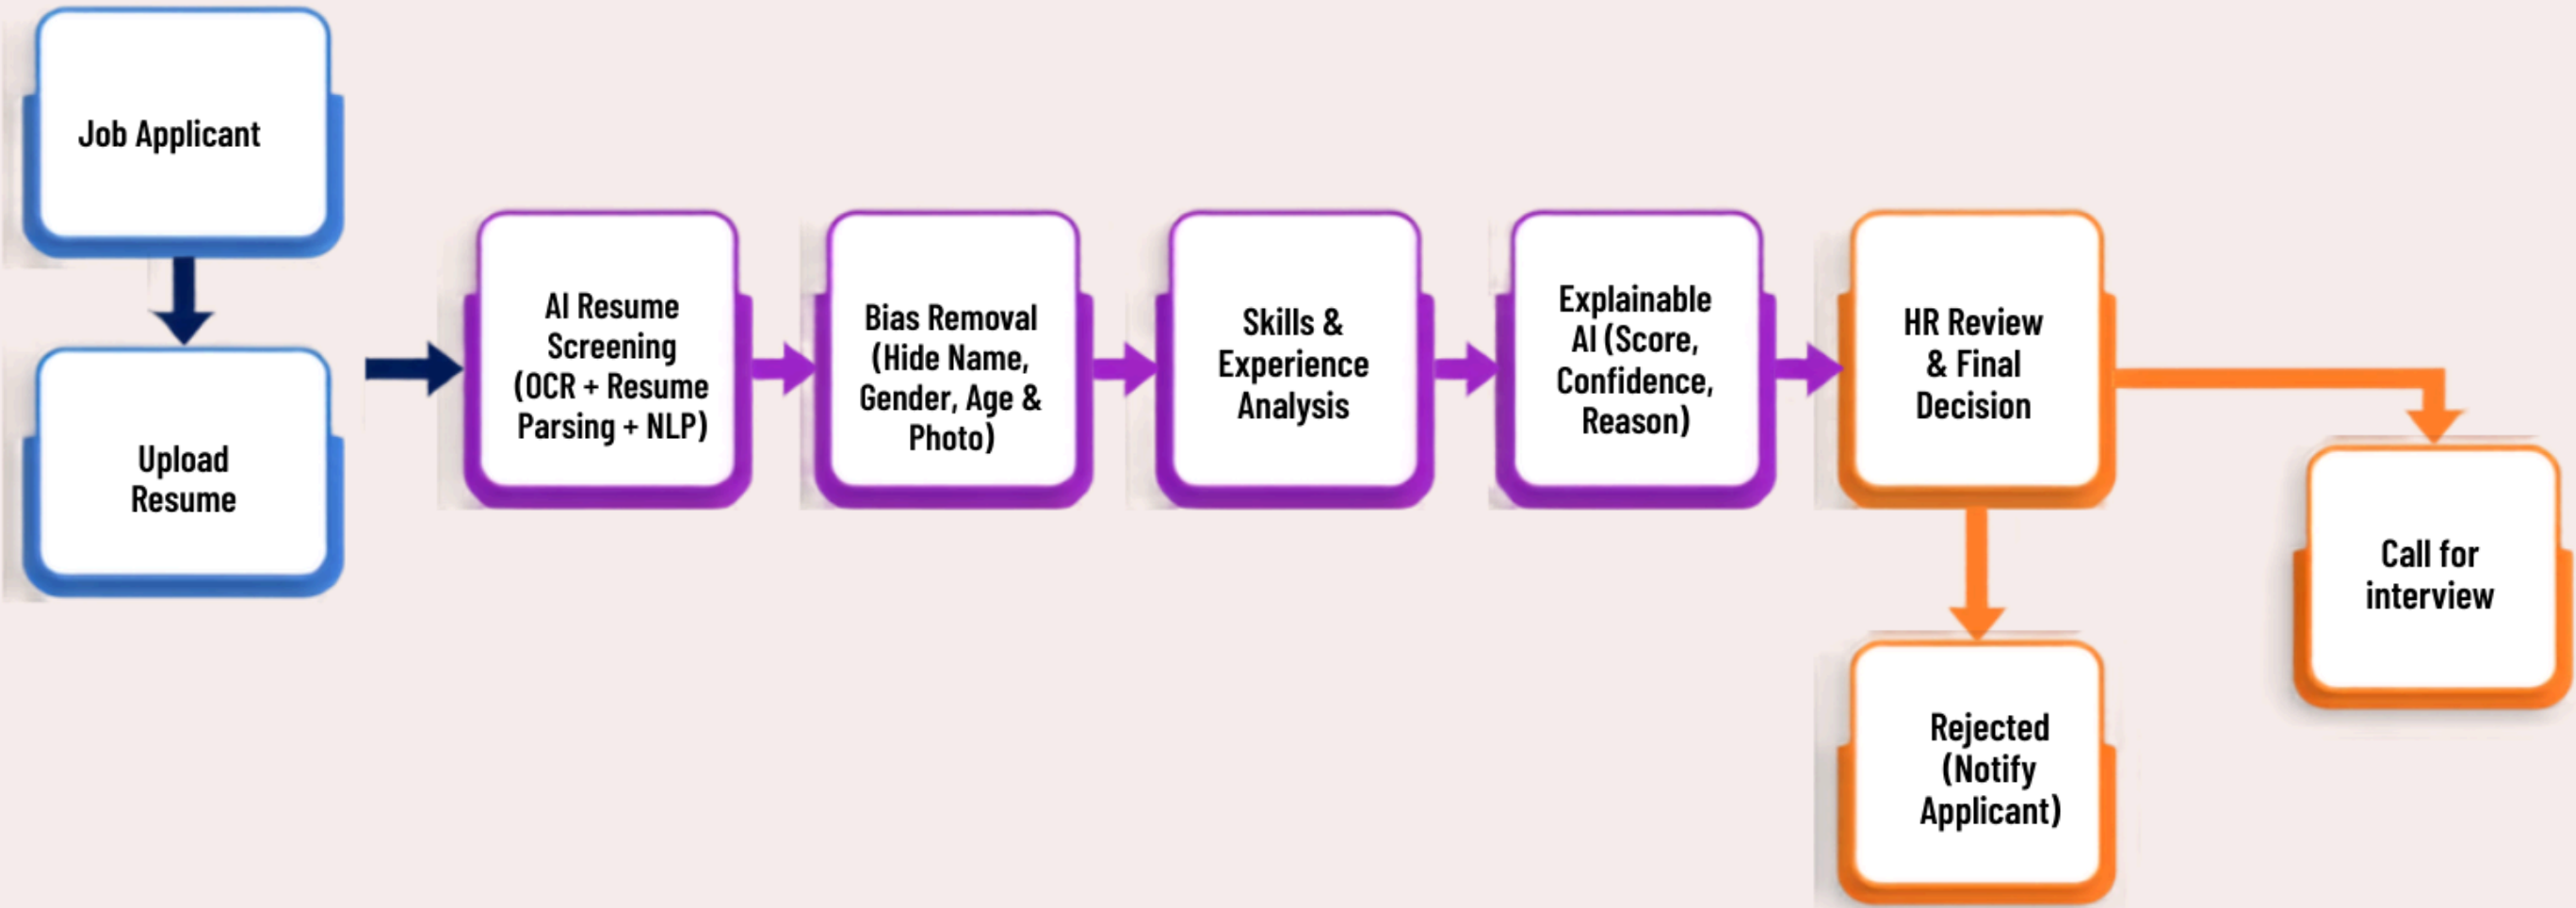

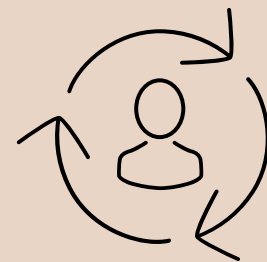

Fig.: Workflow of the Resume Screening System

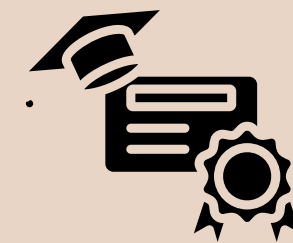

Blind Resume Screening

OCR converts pdf file to text file, gender keywords are automatically stripped from resumes.

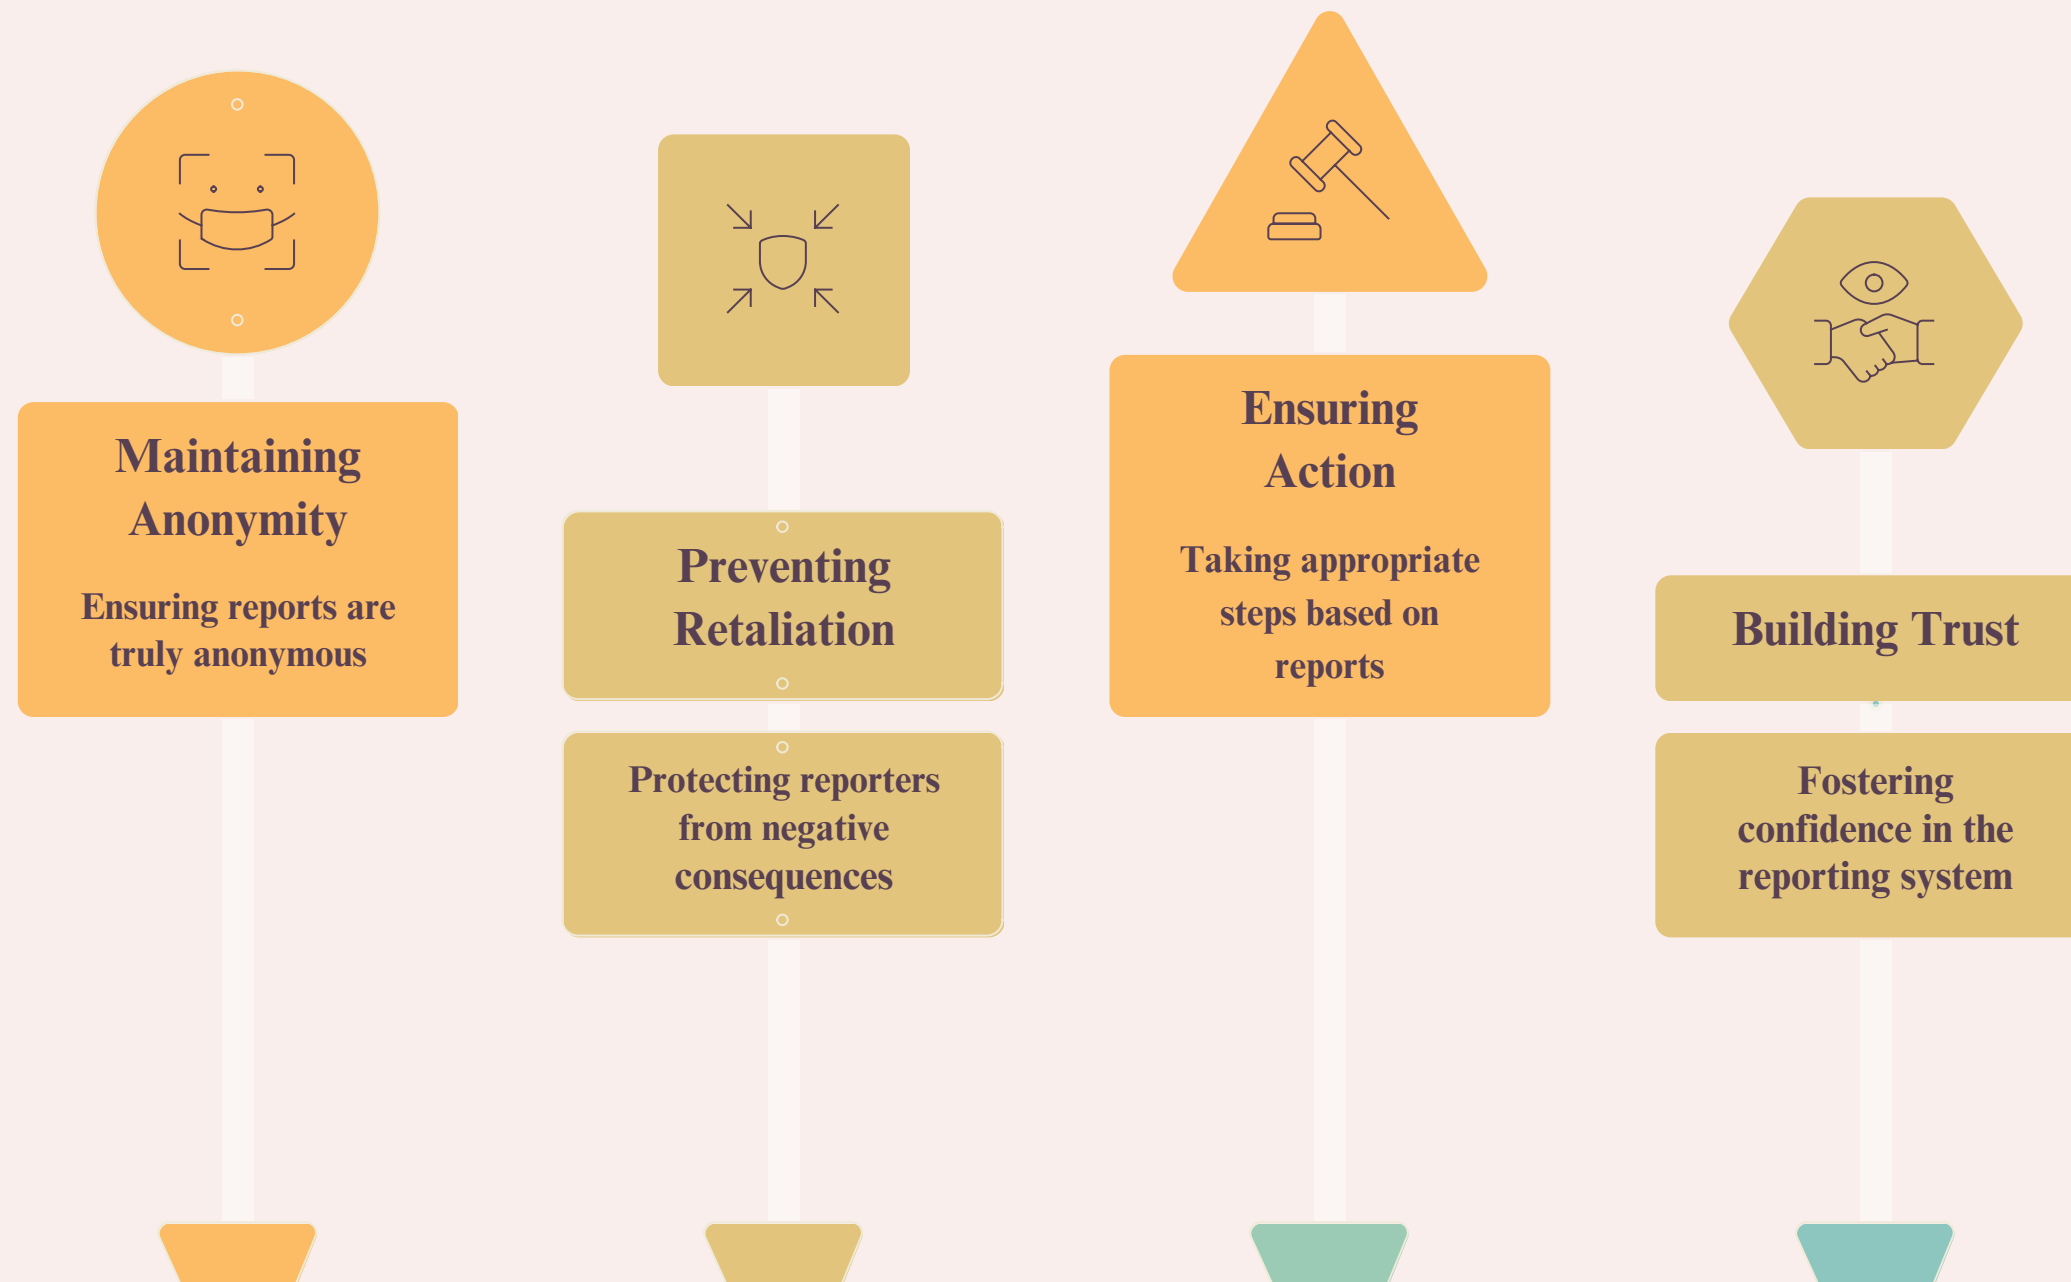

Ensuring a fair start for men, women, and LGBTQI+ candidates.

Focus purely on merit and skill.

SafeVoice: Anonymous Reporting

Promotional Analysis

Assessment of
employees
performance
for due
promotion

Pay Parity Tracking

Analysing if the existing
pay gap is justified

Anonymous chat with HR

Checking validity of the
raised concern

Candidate Comparison

comparing and
recommending
candidate having
same skill set

Target Users

HR & Organizations

Gain powerful tools for hiring, employee management, promotion recommendations, and fairness analytics.

Employees

Benefit from transparent performance tracking, Secure way to report workplace concerns anonymously.

Job Applicants

Receive fair, skill-based resume evaluations without personal bias.

Feasibility Study

Technical Feasibility

- Web technologies (React, Node.js, MongoDB)
- AI technologies such as OCR, and Explainable AI are already available

Economical Feasibility

- Uses open-source technologies, reducing development cost
- Subscription (SaaS) model can generate recurring revenue

Operational Feasibility

- Simple interfaces for Applicants, Employees, and HR
- Integrates with existing HR workflows
- Reduces manual resume screening

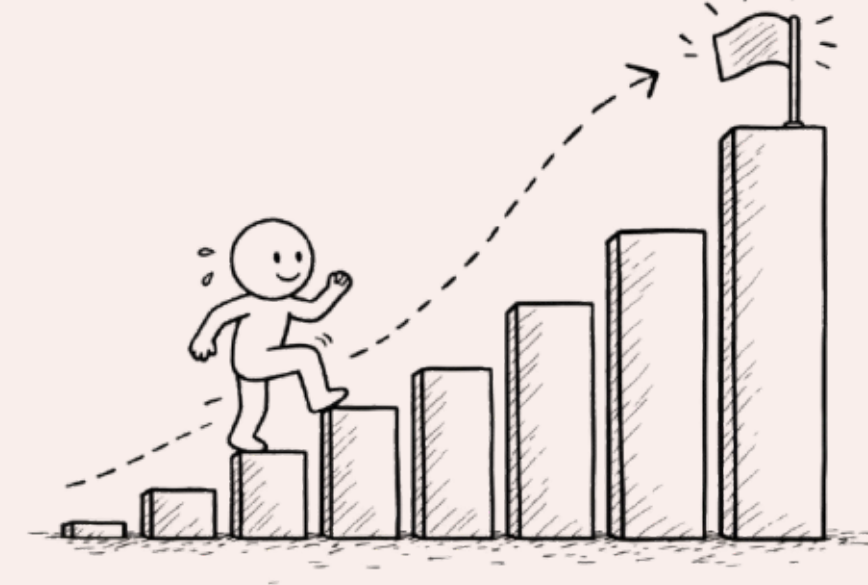

Business Model

B2B SaaS — Subscription Pricing Tiers

Organizations subscribe to FairLens monthly or annually, based on employee count and AI features required.

Plan	Target Customer	Features
Starter	Small Businesses	Employee management, attendance, basic analytics
Professional	SMEs	AI resume screening, career coach, anonymous reporting
Enterprise	Large Organizations	Fairness dashboard, custom integrations, dedicated support

Scalability

Market Expansion

- Universities
- Startup
- Small & Medium Enterprises (SMEs)
- Large Enterprises
- International Markets

Product Expansion

- AI Interview Assistant
- Payroll & Compensation Analytics
- Employee Wellness Insights
- Compliance & Audit Tools

Expected Impact

Employees

- Fair Hiring
- Safe reporting
- Inclusive Workplace

HR Teams

- Diversity insights
- Pay-parity tracking
- Better decision-making

Organisations

- Improved trust
- Stronger workplace culture
- Better compliance

THANK YOU!!
